

2/17/17

To whom it may concern:

As a resident of Ct and a frequent library user, I am horrified to hear that the Governor will discontinue funding C-car. My library is wonderful, but does not have every copy of a mystery series on disc. So as to hear all of the titles, I take advantage of c-car. I also have requested copies of books and even dvds when my library didn't own them. I can travel to other nearby libraries to get something, but often what I want isn't owned by these other local libraries.

As you can see, I use the service quite often and would be very sorry to lose this most very valuable service. I know many people who use this service too and know that they would not like to see this disappear. PLEASE vote to keep C-car for the benefit of library customers in the state of Connecticut. Thank you.
